United Overseas Bank Limited Co. Reg. No. 193500026Z

Take advantage of our greatest resource

Solar power – created by converting sunlight into electricity – has proven to be a reliable choice of renewable energy in Southeast Asia. As the region receives a minimum of 3.5 to 6 hours of solar irradiance per day, commercial buildings in the region enjoy the optimal conditions to be powered by solar.

Over 40 years of technological advancements in production of solar systems has resulted in greater manufacturing efficiencies and economies of scale, thus making solar power accessible to all.

This makes solar power an easy, affordable and sustainable option to cut back on your business' electricity bill and greenhouse gas emissions. With an Investment Rate of Return (IRR) of more than 15%*, switching to solar power is an attractive investment for your business.

*The Investment Rate of Return (IRR) is derived from UOB's analysis of the Southeast Asia solar energy market, taking into account government incentives and renewable policies, and where applicable, net energy metering guidelines calculated over a 20-year lifespan of the solar PV system.

More benefits for you, and the planet

At UOB, we are committed to our customers and the environment. We believe that there's a way to positively impact them both - through solar initiatives with cost benefits that businesses can enjoy.

UOB's U-Solar programme provides your business with green financing to reduce the upfront investment for solar.

Save up to
25%
on your electricity bill

Use solar energy and achieve significant reductions off your electricity bill immediately.

Cut your
**carbon
footprint**

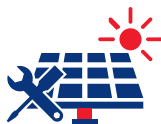

Reduce 780 tonnes of carbon emissions - the equivalent of a car driving 70 revolutions around the earth.

Be recognised
as a
**green
company**

Enjoy the enhanced reputation of employing green solutions.

Enjoy a
**one-stop
solar solution**

UOB's solar partners will handle the assessment, installation and maintenance of the solar system so you can enjoy a hassle-free experience.

Access
**flexible
financing plans**

UOB offers competitive financing plans to kick off your journey to sustainability.

Trusted
partners using
quality equipment

Only quality equipment will be used by UOB's solar partners.

Quality services included in packages* by UOB's solar partners

1

Site assessment

Evaluate your potential savings and estimated rooftop potential.

2

Installation

Have your solar panels installed at no extra cost.

3

Maintenance

Enjoy an attractive maintenance package of your solar panels.
